AI AUTOMATION ENGINEER | PROCESS OPTIMIZATION | AI AGENTS

SUMMARY

AI Automation Engineer with 3 years of experience taking manual work out of sales, marketing, HR and operations. I start from the team's pain, fix the process, then automate it and measure the result. Recent results: AI review of ~95% of sales calls instead of ~20 per rep a month, ad alerts that pulled ~$1,600 from weak creatives in the first month, and an AI HR assistant used across the company. I came from sales and led a sales team, so I build around how people actually work.

WORK EXPERIENCE

AI Automation Engineer — Projector **Jul 2025 – Present**

- Built Nexi, an AI HR assistant in Slack for the whole company (~105 employees): it answers policy and role questions, finds colleagues and their contacts, shows who is on vacation, runs performance reviews, reminds leads about birthdays and work anniversaries, and hands complex cases to HR.
- Built AI quality review for sales calls: ~95% of valid calls are now scored automatically, instead of ~20 per rep a month by hand, with a weekly feedback digest for every manager.
- Launched daily alerts on Meta ad creatives that waste budget: ~$1,600 of spend pulled from weak creatives in the first month, ~$650–850 net savings.
- Rebuilt lead routing for the sales team: new deals, consultation requests and missed calls reach the right rep automatically, with rotation and exceptions managed in one sheet.
- Replaced 143 Zapier automations with one n8n system covering all 61 live courses; course managers now connect new forms themselves.
- Cut support's mentor search from 7–15 minutes to 2 per request with an AI matching bot, saving about an hour a day.
- Built an AI agent for B2B sales that analyses partnership requests and drafts tailored training programs and client presentations.

Automation & AI Specialist — Projector **Jun 2024 – Jul 2025**

- Built lead tracking, deal distribution and reporting in Make and Zapier: response time 3× faster, manual routing removed.
- Launched 15+ GPT-based assistants for admissions and HR, cutting deal cycles from 7 to 3 days and lifting conversion by 10%.
- Shipped internal AI tools (email assistant, Telegram bot) and live dashboards for leadership.

Sales Operations Lead — Projector **Feb 2024 – Jun 2024**

- Automated Pipedrive workflows, cutting repetitive actions from minutes to seconds.
- Moved pipeline management from manual updates to automation, improving CRM data accuracy.
- Led the sales team for several months, hired sales managers (one is now a top performer) and covered for the Sales Lead.

Sales & Support Manager — Projector **Oct 2022 – Feb 2024**

- Closed 3,200+ B2C and B2B deals worth UAH 61.65M at 73% conversion.
- Built 20+ CRM dashboards for analytics and performance tracking.
- Mentored and onboarded new sales managers.

PROJECTS

- **AI lead generation for a DACH B2B client (freelance).** The client sets targeting and prompts in a Google Sheet and gets 100–1,000 qualified leads per run, enriched and scored, with a personal first message for each.
- **Custom MCP servers for Claude:** Meta Ads analytics and a personal-finance assistant.

KEY SKILLS

- AI agents and assistants: Claude, Claude Code, OpenAI, Gemini
- LLM evaluation and prompt testing
- Workflow automation: n8n, Make, Zapier
- APIs and webhooks; Python, JavaScript, Apps Script, SQL
- Process mapping and documentation for non-technical teams
- CRM and HR systems: Pipedrive, Zoho CRM, Salesmate, PeopleForce
- Lead generation: Apollo, Lemlist
- Notion, Airtable, Google Sheets, Slack
- Hiring and team leadership

EDUCATION

Ivan Franko National University of Lviv **Sep 2021 – Jun 2023**

- Entrepreneurship, Trade & Exchange Activities (not completed)
- Courses at Projector: AI for Product Creation, SMM for Business, Product Management Beginning
- Certificate: Combat Lifesaver (tactical medicine)

LANGUAGES

- Ukrainian — native
- English — B2 (Upper-Intermediate)
